* In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

† Figures not available.

Explanation of symbols used :- B. = Births; B.R. = Birth Rate; C. = Cholera; S. = Smallpox; P. = Plague; F. = Fevers; D.D. = Dysentery and Diarrhoea; R.D. = Respiratory Diseases; M.D. = Maternal Deaths; D.R. = Death Rate; I.D. = Infantile Deaths (included in total deaths).

REMARKS

The figures of births and deaths shown in the statement for week ending 15th September, 1951, relate to 200 towns with an estimated population of 26,043 thousands. The total number of towns is 253 and their population is 29,076 thousands. Thus 79% of the total number of towns representing 87% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 19,316 and 9,137 representing birth and death rates of 38.6 and 18.2 per thousand of population respectively.

(A) States (Parts A & C).—The data here relate to 170 towns with an estimated population of 22,632 thousands. Information about Assam and Bihar could not be included. The total number of towns is 219 and their population is 25,676 thousands. Thus 80% of the total number of towns representing 88% of the total population is covered. The numbers of births and deaths recorded in these towns were 17,095 and 8,213 representing birth and death rates of 39.3 and 18.9 per thousand of population

respectively. The table at the end gives the position by States.

The towns of Pandharpur in Bombay, Anakapalle and Nellore in Madras record high death rates of 50.5, 53.5 and 57.4 per thousand of population respectively. The high death rates in Pandharpur and Anakapalle were to a large extent due to deaths from fevers, and dysentery and diarrhoea. The high death rate in Nellore was to some extent due to deaths from cholera.

(B) States (Part B).—The data here relate to 24 towns with an estimated population of 3,411 thousands. The total number of towns is 31 and their population is 4,300 thousands. Thus 71% of the total number of towns representing 79% of the total population is covered. The numbers of births and deaths recorded in these towns were 2,221 and 924 representing birth and death rates of 33.9 and 14.1 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
